It's been a pleasure working with Fullmer construction on the build out of our new executive office space at Westlake Park Place in Westlake Village, CA. We elected to go with Fullmer based on their existing work experience at the location coupled with recommendations received during project bidding. Throughout the process, everyone at Fullmer has been totally engaged, easily accessible, and committed to making sure our needs are met. From being proactive in providing cost and/or time saving ideas during the value engineering phase, to staying on time and on budget during construction, I always felt the team at Fullmer was an extension of our team, sharing our vision and executing to our expectations.

Andrea Brule
Vice President/General Manager
